

sustainable tourism

Nestled within a nature corridor, Esk Caravan Park is fortunate to be surrounded by the beauty of our natural surroundings.

Our entire team deeply values the importance of harmonising with and supporting the ecosystem and community that embraces us.

We are thrilled to share that we recently achieved an 83% result on our sustainability scorecard through Eco Tourism Australia, a testament to our commitment to environmental stewardship.

This scorecard, based on Ecotourism Australia's best practices, evaluates our efforts across four pillars: environmental impacts, socioeconomic impacts, cultural impacts, and sustainable management and was evaluated by a trained sustainability assessor within the Ecotourism Australia team.

We are also honoured to be recognised as a Quality Tourism Accredited Business for Sustainable Tourism by the Queensland Tourism Industry Council, the peak industry body for tourism in Queensland.

It reflects our dedication to crafting high-quality, engaging, and memorable experiences for our visitors while demonstrating sound sustainability principles.

We are proud to be part of a sustainable tourism ecosystem that values the preservation of our Region's natural heritage for generations to come.

CONTAINERS FOR CHANGE

At Esk Caravan Park, we hold a deep belief that social responsibility is not just a duty but an extraordinary opportunity to give back to our wonderful little community, and your dedication to reducing the Parks carbon footprint provides invaluable support to several local initiatives

In 2023, your efforts saved over 38,000 items from landfill - an inspiring testament to the impact we can create together. This amounted to \$3,800 sponsorship funds which we matched dollar-for-dollar to support numerous local causes, community groups, and events.

So remember, while you're here immersed in the beauty of our PicturEsk piece of Paradise, your commitment to recycling not only nurtures the environment but also enriches the lives of the diverse community groups in Esk - and we thank you for being an integral part of this positive impact.

Together, let's aim for even greater recycling efforts throughout 2024 to reduce our environmental impact and increase the support of our local community!
